And get myself elected.

In the Market For a WHEAT DRILL

Then Our "New Peoria" Is What You Want

It has perfect working discs, fitted with dust proof chilled bearings, single draw bars that will not gather trash, staggered spoke wheels with 7-inch hub and 3-inch tires, continuous rear bar with truss rod to support seat and keep drill from sagging, direct pressure in rear of disc; a feature we claim will make this drill work perfectly in any land suitable for sowing grain and where other drills cannot be operated. A seat in center of drill convenient to lever is also furnished. Drop in and let us show you what this drill can do, and furnish you with the names of a score of satisfied users. One feature of our drill that puts it in a class by itself and makes it superior to all other drills on the market is the "Peoria Disc Shoe." You won't find the disc shoe on any other press drill on earth, the Peoria people have that feature cinched and they are going to hang on to it. If you want to know why we can grow more wheat to the acre after this drill than any other with the same amount of grain sown, come in and let us explain to you the "New Peoria Disc Shoe Drill."
